It is time for the annual report on insect new issues. In calendar 2006 we had a slight decrease in the number of new insect issues over the previous year. The total number of insect new issues seems to be staying around 300 per year over the past few years. I measure the number of new issues by the height of the stack of 3x5 index cards, one per stamp, that I accumulate each year. (20mm = about 100 cards). Local and known illegal issues are not included.

1996	80mm = ~400 stamps	2002	122mm = ~610 stamps
1997	119mm = ~595 stamps	2003	91mm = ~455 stamps
1998	125mm = ~625 stamps	2004	54mm = ~270 stamps
1999	133mm = ~665 stamps	2005	68mm = ~340 stamps
2000	165mm = ~825 stamps	2006	63mm = ~315 stamps
2001	191mm = ~955 stamps
