

# MAMMALIA

Editor

Michael Prince, LM 868

A few words of explanation are called for regarding the following identifications.

Under the Costa Rica issue, I have listed #619b as *Sotalia fluviatilis*, whereas the stamp is labelled *Sotalia guianensis*. My references note that there is some discussion as to splitting the Tucuxi into 2 species with *S. fluviatilis* becoming the inland river species and *S. guianensis* being the coastal species. At present however, I do not have confirmation that this has been accepted and for the time being the stamp is listed as *S. fluviatilis*.

Under the Marshall Islands wild cats issue, I have listed #907j *Neofelis nebulosa* as Indochinese Clouded Leopard. This is because the Clouded Leopard has now been split into 2 species with the populations on Borneo and Sumatra being raised to species level as *Neofelis diardi*, Diardi's Clouded Leopard. I have yet to establish whether any previous stamps issued as *Neofelis nebulosa* actually depict the new species.

There are 3 new species on stamps included in the following listing, all of them on an issue from Malaysia.

<b>AFGHANISTAN</b>	2003	Animals	
1422m/s	40a	Leopard	<i>Panthera pardus</i> Felidae
<b>AUSTRALIA</b>	October 1, 2008	Large Extinct Mammals
