

MAMMALIA

Editor

Michael Prince, LM 868

An explanation is required regarding the following identifications.

Under the Micronesia dolphins issue, #828b would seem to be a new species on stamps. However, in the June 2009 issue of Biophilately I explained my reason for listing Costa Rica #619b as *Sotalia fluviatilis* rather than the newly created species *Sotalia guianensis*. There now seems to be more consensus that there are 2 *Sotalia* species and therefore Costa Rica #619b should be changed to *S.guianensis* and noted as a new species on stamps.
