

ENTOMOLOGY

Editor

Donald Wright, Jr., BU243

At the annual meeting of the Biology Unit at NTSS in Milwaukee in June, it was decided that each subject editor was free to list whatever issues he wished, regardless of its recognition by Scott Catalogues. Since I get requests for identification of non-catalog stamps, I have chosen to list whatever I am aware of and leave it to the readers to select and choose which ones they wish to collect. Where possible, I will note those of dubious status. Those printed for many African countries and sold to dealers by Stamperija, Ltd. will be so noted, for instance.
