EXTRACT

Here is a sample of entries under the letter "C" from the new Collectors Club of Chicago: Philatelic Encyclopedia reference (see above). The entries for letters "D" through "Z" are still under construction, but this looks like it will be quite a useful tool for philatelic research.

Clerk 51, 54, 55 and 56: used during 1909-1920, identification of U.S. railway mail clerks who canceled stamps on their routes.

Cliché: end result of the process of applying a design into metal; individual identical units that are used to make up a printing plate, plate, image, block, photo, line cut, position.

'Click-n-Ship': USPS service that allows individuals to print shipping labels and pay for postage online via a credit card.

Click Stamp: a postage imprint produced by Pitney Bowes.

Climax Dater: rubber date cancel used 1885-1935 in Great Britain at small postal facilities. Original usage was in violet ink until 1911, when ink pads were then changed to black ink usage.

'Clipper': Pan-American Airways plane designations, conducted numerous first flights on the trans-oceanic routes.

Clipperton Island: An uninhabited atoll ca. 700 miles SW of Acapulco, México; awarded to France in 1935. The island was owned by the Oceanic Phosphate Co., who operated a guano business there during 1893-1897, and who privately issued stamps for use on employee mails conveyed by the company's ships when travelling between the island and San Francisco. The series-of-10 stamps were printed by lithography during March 1895 in San Francisco in five different designs, and were perforated 11½. All of the stamps depict a central map of the island enclosing '1895,' and are with differing borders. Used copies appear to be precanceled with a violet double-ring *W. FRESE & CO. SAN FRANCISCO // AGENTS FOR O.P. CO.* handstamp. They were first recorded in the 15 June 1895 edition of the British philatelic journal *Stamp Collectors Fortnightly*.
