

MAMMALIA

Editor

Michael Prince, LM 868

This listing of mammals is a rather lengthy one in order to catch up with the Scott numbers issued during recent months, details of which I had been unable to obtain.

There is just one comment to make regarding the species listed and this is in respect of the issue from Ross Dependency. The Dwarf Minke Whale is listed as a subspecies of the Minke Whale, which is how it is currently described; with an accompanying note that further research will probably confirm that it should be a full species. I have not listed as a new species as yet, but will do so if and when a new species name is recorded.
