---

**Stamperija Issues:** These are produced by Stamperija Ltd., a firm in Lithuania that produces many topical issues for several African governments. These are sold only to governments and dealers. Although reported to be available in the post offices of the country named, they are not listed by Scott and other catalogs, but I list them for those interested. I have not seen these stamps and list them from illustrations on their web site where the insect names, and occasionally the values, are often too blurred to read.
