New Listings

Scott#	Denom	Common Name/Scientific Name	Family	Code
CHINA (Taiwan)		2012 May 23		
4031	\$5	<i>Amanita rubrovolvata</i>	Amanitaceae	M
4032	\$5	<i>Entoloma muraii</i>	Entolomataceae	M
4033	\$12	<i>Gaeastrum sessile</i>	Gaeastraceae	M
4034	\$12	<i>Clavulinopsis miyabeana</i>	Clavariaceae	M
4035	\$34	SS of 4, as above		

Given the shortness of the list of new fungus and fungus related issues over the last several months, I decided it was time to review sales offerings of mushrooms on stamps. BIG mistake!

When I took over editing the Fungi listings for this publication, I was given one guideline that, while not chiseled in stone, made sense to me as a Scott Catalogue dependent American collector. The guideline was to include Scott numbers when listing items, which really means include only Scott-listed items. And, with the exception of the listings of items from Linn's weekly newspaper not yet assigned a catalogue number in their new issue update, I have fairly carefully followed that guide.

Unfortunately, checking the offerings on the Internet has shown me an enormous gap that exists between stamps listed in, and materials being issued for countries not recognized by, the Scott Catalogue. Most of these issues are for "countries" that are actually revolutionary councils, secessionist states, and similar political entities. Many bear a striking resemblance to the issues for "Russian Republics" in the 1990s. The list of items I have been able to document that Scott has chosen not to include is extensive (and probably seriously incomplete).

In addition, while compiling this material for publication I double-checked the listings in *Biophilately* back to the beginning of 2001, and found several Scott-listed issues that were missed in this column (plus a few mistakes or items with incomplete information). While many of these occurred in issues from 2001 (the transition year between me and my predecessor), I have missed enough all on my own to be embarrassed by the oversights.

So, beginning below and continuing until the listing is as complete as I can make it (hopefully with your help where gaps exist) is a listing of items I have found in this research. I divided the listing into three sections: Errata (corrections of published mistakes), missed Scott numbered items (noting the sets but without details of the individual stamps), and new non-Scott information (materials that I have derived primarily from sales offerings). I have included only the set information in the lists since I am unable to resolve many of the illustrations and also to keep the lists from extending over many dozen pages.

The final listing here corresponds somewhat to the "For the Record" information that the Scott Catalogue used to publish. It is information only and is in no way a suggestion that you run right out and "complete" your collection by including this material. Scott has made its call as to the validity of these items (which will affect your ability to exhibit this material competitively in accredited exhibitions), but ultimately you make your own call as to collectability.

Errata

These items are based on my review of “Fungi” in *Biophilately* since 2001 (Vol. 50, No. 1).

SAINT VINCENT – Vol. 50(2), p.140

Correction: “St. Vincent” 2001 March 15, should read “St. Vincent & Grenadines.”

INDIA – Vol. 51(1), p.12

Update: Listed here without family (more accurately with family “?”) are mushroom lookalike corals. **Note:** Vol. 51(2) includes a note to delete this record. I retain the stamps in my collection as lookalikes, along with other corals, architectural devices, rocks, “mushroom clouds” from atomic explosions, etc. Another case of your collection, your choice.

SAINT VINCENT & GRENADINES – Vol. 51(2), p.63

Update: The butterfly sheetlet described indeed has a mushroom in the selvedge. The issue date of 2001 December 10 and Sc#3000 are accurate.

DOMINICA – Vol. 52(2), p.55

Correction: Sc#2379, issue date was 2002 July 29.

GAMBIA – Vol. 53(4), p.176

Update: The listing is missing the souvenir sheet that accompanied the two MS of 4 different listed. It is Sc#2823 with a value of 75d, *Russula sanguinea* in the Russulaceae.

ICELAND – Vol. 53(4), p.176

Correction: The first issue lists as “*Amamnita*,” a glaring typo for “*Amanita*.”

MAURITANIA – Vol. 55(1), p.21

Correction: 2000 for 2004?

LIBERIA – Vol. 56(4), p.143

Update: Sc#2454–60, issue date was 2007 March 1.

PALAU – Vol. 56(4), p.143

Update: Sc#877–78, issue date was 2007 February 15.

SPAIN – Vol. 56(4), p.143

Update: Sc#3505–06, issue date was 2007 June 1.

NAMIBIA – Vol. 58(2), p.39

Update: Mushroom identified in my personal file as *Podaxis pistillaris*.

BELARUS – Vol. 61(2), p.81

Update: Sc#741–44, Family names as follows: *Clavariadelphus* – Clavariaceae; *Langermannia* – Lycoperdaceae; *Hericium* – Hericiaceae; *Sparassis* – Sparassidaceae

[Ed. note] The following listings do not all follow the standard checklist format in order to minimize their length and thus reduce the number of pages needed. The associate editor provided these lists in a somewhat different format including abbreviations and codes describing the entries to further reduce the size. I have reformatted the listings and changed the abbreviations and codes to conform to the standard glossary entries found on page 189. Any errors that may result from these transformations are entirely my fault.

Note: All items are perforated unless otherwise indicated.

Awaiting Catalog Listing

These items are awaiting assignment of catalogue numbers.

Country	Issue Date	Description	Code
Estonia	08-30-12	45c single stamp	M
Grenada-Grenadines (Carriacou)	12-16-11	MS of 4 different & SS of 1	M

Tuva	2001	Strip of 7 different (5 denom) & SS of 1 (25 denom)	M
Udmurtia	2001	Strip of 7 different (5 denom)	M

Several of the “countries” in the above listings have made available for sale imperforate varieties, deluxe sheets (both noted above), and progressive proofs of many of these items. As noted in the Non-Catalogue list, the value of any item as a collectable is determined by collectors, not retailers. My personal thought is that it appears the producers of these three types of additional items issued them solely for the philatelic market and, in concert with the Scott Catalogue editors, I believe they are not worthy of catalogue or collection space.

I will end this listing with an appeal. I am a compulsive list maker and am certain that there are items missing from this listing. I am working from current sales offerings, and I suspect that there are items that are generally out of stock, and thus absent from these listings. If you are aware of any (many) that I have missed, please let me know. [Ed. note: See contact information on the back of the cover page.] I will publish a supplement to this list to make the information as complete as possible (even doubting their collectability).
