

MAMMALIA

Editor

Michael Prince, LM 868

This editions mammal listing requires a couple of explanatory notes regarding new species on stamps. Firstly, I have listed both China(Taiwan) and Tuvalu *Feresa attenuata* whale stamps as new, though strictly the Taiwan was issued a month before the Tuvalu set. Secondly, the Vietnam *Nycticebus bengalensis* loris stamp is another example of a single species now being split into two species. Some of the original *N. coucang* already depicted on stamps may well prove to be the new species upon investigation.
