

MAMMALIA

Editor

Michael Prince, LM 868

This selection of mammals on stamps includes an amazing 13 new species, most of them being rodents. The new monkey species on a Sri Lanka issue arises from the fact that what used to be a single species, *Semnopithecus entellus*, has now been split into 7 different species. Finally, I usually avoid including stylized designs, but have included a South Africa issue as all mammals depicted are still perfectly recognisable.
